DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10, 11, 19-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Filiol et al(US 6,515,553).

The reference by Filiol et al discloses a phase locked loop, see abstract figure and figure 6, with phase detector(10), loop filter(12) to provide a control signal; a feedback signal is provided to the PFD to be compared with the reference signal. The first control signal is the regular error signal from loop filter while the second control signal(I_{dc}) is added to the loop to allow for the control signal to be produced with an instantaneous value equal to zero by way of offsetting any mismatch from the charge pump(see col. 8, lines 17-end of page). This occurs when the PLL is in lock condition.

Allowable Subject Matter

Claims 1-9, 12-18, allowed.
